

News

For the Offboard Diagnostic Information System Engineering the new version 17.0.1 is available on the MirrorServer/2.

All necessary information, e.g. about the current valid distribution channels for the software, can be found on the Intranet: <http://odis-engineering.wob.vw.vwg> (for group-internal users).

Important notes:

Installation instructions:

(X) Update (only with ODIS Engineering version 17.0.0 installed)

(X) Reinstallation

(X) Overinstallation

Important Notes:

To display additional documents in full from the Guided Function (GFF), perform a new or overinstallation.

An update from version ODIS Engineering 17.0.0 results in an error message when using additional documents.

Firewall Configuration:

The details can be found in the release notes or contact the responsible administrator.

Further information can be found in the release notes.

If you have any questions, please do not hesitate to contact our technical support:

Email: odis-engineering@volkswagen.de

Information for Skoda users:

For Skoda users, there isn't given an official release. As soon as you may use the software, you will be informed by Mr. Jaromir Krecl (Jaromir.Krecl@skoda-auto.cz), separately.

In case of questions, contact Mr. Krecl.

Information for Seat users:

For Seat users, there isn't given an official release. As soon as you may use the software, you will be informed by Mrs. Pajares (ines-maria.pajares@seat.es), separately.

In case of questions, contact Mrs. Pajares.
